Chief, Communications Division

[redacted]  
**Miniature Gasoline Generator**

This document is part of an integrated file. If separated from the file it must be subjected to individual systematic review.

25X1

1. This will acknowledge receipt of two proposals from [redacted] on the subject of miniature internal-combustion generators and auxilliary devices.

25X1

25X1

2. It is noted that their new specifications contain improvements over the originals and are more definitive. It is apparent that [redacted] has carried their design and laboratory work to a relatively advanced stage. However, a preliminary study of the proposals by our engineers have raised questions which can best be resolved by an inspection of Hoffman's model and discussion with their engineers.

25X1

3. Therefore, our previous recommendation to have [redacted] bring their laboratory model to Washington is confirmed as being highly desirable. It is requested that this office be advised of the earliest date for which arrangements can be made for this inspection.
